

Tray Collection

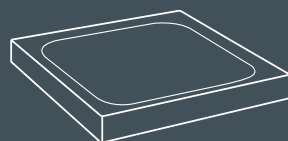

Shower tray style is a key element to the overall look of your shower enclosure and increasingly becoming a fashionable feature within the bathroom. However, sometimes the floor type will dictate the type of shower tray that is required (you will need to check this with your installer) and that's why we offer a range of shower tray's suitable for all installations.

Another consideration when choosing your shower tray is to ensure that it is the right size and shape for your shower enclosure. With our vast array of shower tray footprints, we are confident we have all bases covered at a price that is right for you. Below is a quick reference guide to help you choose the right one.

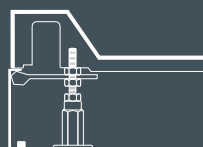

Slimline

Elegantly shallow 45mm high creates a wet room styling with the benefit of retaining the water in the showering area. The discreet profile also makes this an easy access option because there is no real need to step up into the shower enclosure.

Standard

A simple elegant design at 80mm high, extremely durable to create a quality foundation to house the most stylish shower enclosures.

Raised

Adjustable legs are fitted to the underside of the tray to raise it off the floor so the waste does not need to be plumbed under floor level. A perfect solution if you have a concrete floor or you cannot gain access under the floor and provides quick and easy access to the waste during and after installation.

Materials

ABS capped acrylic bonded resin

All our trays give you the benefits of both an acrylic tray and stone resin tray. The acrylic finish makes it easy to maintain and warm to the touch whilst sturdy bonded resin gives you a secure rigid feeling underfoot.

An incredibly discreet profile of just 45mm, this ABS capped acrylic stone reinforced tray makes the Moods Slimline Tray offer the contemporary design of a wet room styling. Whether it is installed flat to the floor or raised on legs, it's sure to impress. The 90mm fast flow waste allows up to 32 litres of water to be carried away every minute. **3** – Denotes the easy plumb riser kit that is suitable for your tray, which lifts the tray 95mm.
